Sea Basing

Marine

Definition

Marine

Sea Basing is

the conceptual approach of using the sea
in order

to **deploy, keep ready, command,**
protect and **support** friendly forces

in a timely, flexible and

largely autonomous manner

as part of **joint operations** from the sea.

What do we gain?

- Extending the political and military options by
 - early deployment,
 - maintaining the freedom of maneuver,
 - limiting the footprint ashore,
 - limiting reliance on HNS,
 - transferring the assistance as a complete package.
